Berry Dash Tutorial

A simple Strategy/Casual game.

1. Understanding how the game works

For Desktop:
Use W, A, S, D or arrow keys to move, space to jump
For Controller:
Use joystick to go in all directions, and use the "A" key to jump.
For On Screen Buttons/Mobile:
Press right or left arrows to move left or right, press the arrow facing up to jump & the reset button to restart.

2. Understanding how accounts work

Accounts are used for leaderboards in 1.33. You will be able to sync your account in the account settings menu to update the leaderboard stats & leaderboard icons. You can request your account to be hidden from the leaderboards within the [Discord Server](#).

3. Settings & Configuration

You can find your settings in the menu, with the options "Full Screen Mode", "On Screen Buttons", "Bigger Buttons (requires on screen buttons to be enabled)", "Show FPS", "Enable VSync", "Music Volume", "Sound Effects Volume"
Each setting can be adjusted to how you would like to play Berry Dash.
